

Senator Goodrich has amended to say that those that want to contribute for another specific purpose, that will be accomplished. I have no objection to any amendment to do what you have just brought out if you so desire.

SENATOR LUEDTKE: Well, my great concern is that the funds provided for the construction of the fieldhouse coliseum including the swimming facilities and including the LB 510 fund will not be able to accomplish all of these matters in this Resolution. In other words, it will require considerable additional funding and I do not oppose the idea of obtaining private funds donated for this purpose and, in fact, many people I have discussed this with, this is what I have urged them to do but I do not believe that we should pass any Resolution urging that anything be done unless it is contingent upon and perhaps we could just have...expand that Paragraph 2 to say that any additional matters would be contingent upon it. I leave it up to you because I think you agree with me that that's what we should do.

SENATOR CARPENTER: The Resolution of course is confined under LB 510 and the only thing in available funds in 510 is the interest which accumulates as the result of the selling of bonds. So I'd think in no case could you spend any more than that. I have no objections to amend this bill to satisfy any apprehension, anybody wants to. I am only the catalyst who many people who are interested, basically, in swimming and as you know there are lots of them and this is, basically, their suggestion and I am only trying to do what I agree with them to do and I am sure the discussion on the floor will determine the intent to the satisfaction of anybody.

SENATOR LUEDTKE: Well, I would request that you give me just enough time to try to develop an amendment to that.

SENATOR CARPENTER: I have no objection.

SPEAKER: Senator Luedtke, if you will get your amendment ready and bring it up. In the meanwhile, we will have Senator Burbach.

SENATOR BURBACH: Senator Luedtke, I don't have a question of you. I am going to make a statement. Sometime ago, quite sometime ago, Senator Carpenter and I went to an early morning breakfast, I believe the Kellogg Center, someplace out on the campus, at least, and at that time the discussion hinged around approximately \$600,000 to make this building taller and to expand the pool, and then additional money could be used for placing ceramic and tile over the concrete and it was felt at that meeting that morning that that would be the 1.2 would do the whole job. Now, of course, I know costs rise. Maybe different costs estimates are available at the moment that weren't at that time. This is probably six or eight weeks ago but that morning the cost figure was all inclusive in this 1.2, at that time.

SENATOR LUEDTKE: May I comment on it.

SPEAKER: Senator Luedtke.

SENATOR LUEDTKE: I am sure that you are not talking about a full size olympic pool with a 10 meter diving board, raising the roof of the area in the swimming pool area when you talked about that. You may have been thinking they were talking about that. They could not have been talking about that, I can assure you.

SPEAKER: Senator Luedtke, do you have your amendment ready to go.
